

BRING YOUR PROJECTS TO LIFE

PHOTOMETALS has provided clients with custom signage in a variety of materials for over 35 years. Most notably, our metal etching process provides very unique textured options for those customers looking for a high quality sign. Our skilled team can produce nearly any project that you can imagine.

MATERIALS

Steel, brass, aluminum, stainless, and more. Materials range in thickness from 0.004" to 0.25" and up to 30" x 60" large.

QUALITY

All of our products are inspected from raw goods to finished products. Manufactured to exact standards and undergo multiple inspections throughout the process.

PHOTO ETCHING

Add dimension to your project with full etch, half etch, frost etch, or flash etch. Directional and orbital grain finishes are also available to provide additional texture.

METALPHOTO™

We offer Metalphoto anodized aluminum sheets that provide a durable, UV-stable, abrasion, heat, and weather resistant product that lasts for years.

FINISHING & MOUNTING

Give your project the extra "Wow!" factor with matte, semi-gloss, satin gloss, mirrored, or frost finishes. We offer several mounting options including VHB foam, industrial strength adhesive, stud mounting, magnet, or pin mounting.

SHIPPING

All orders are available to be shipped using all major carriers to you or the end customer. Local projects available for customer pickup at our facility.
